

Develop RESTful APIs for managing party data:

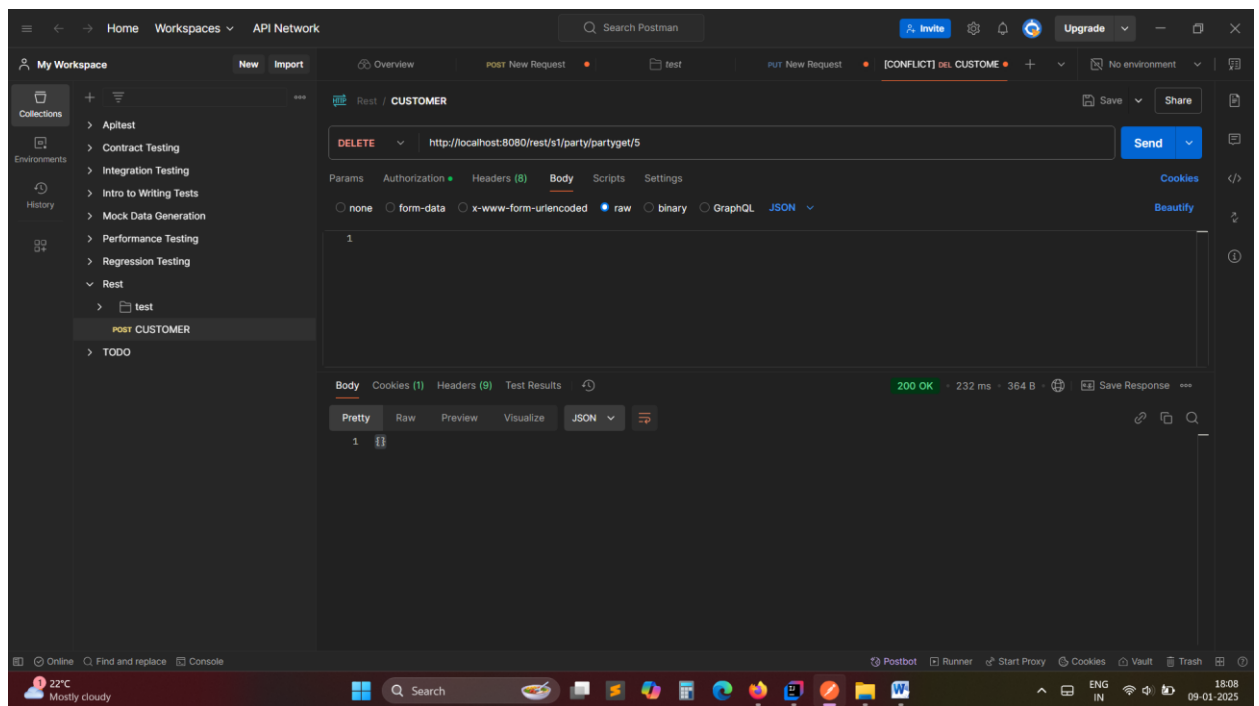

1. Create a Party: POST /parties

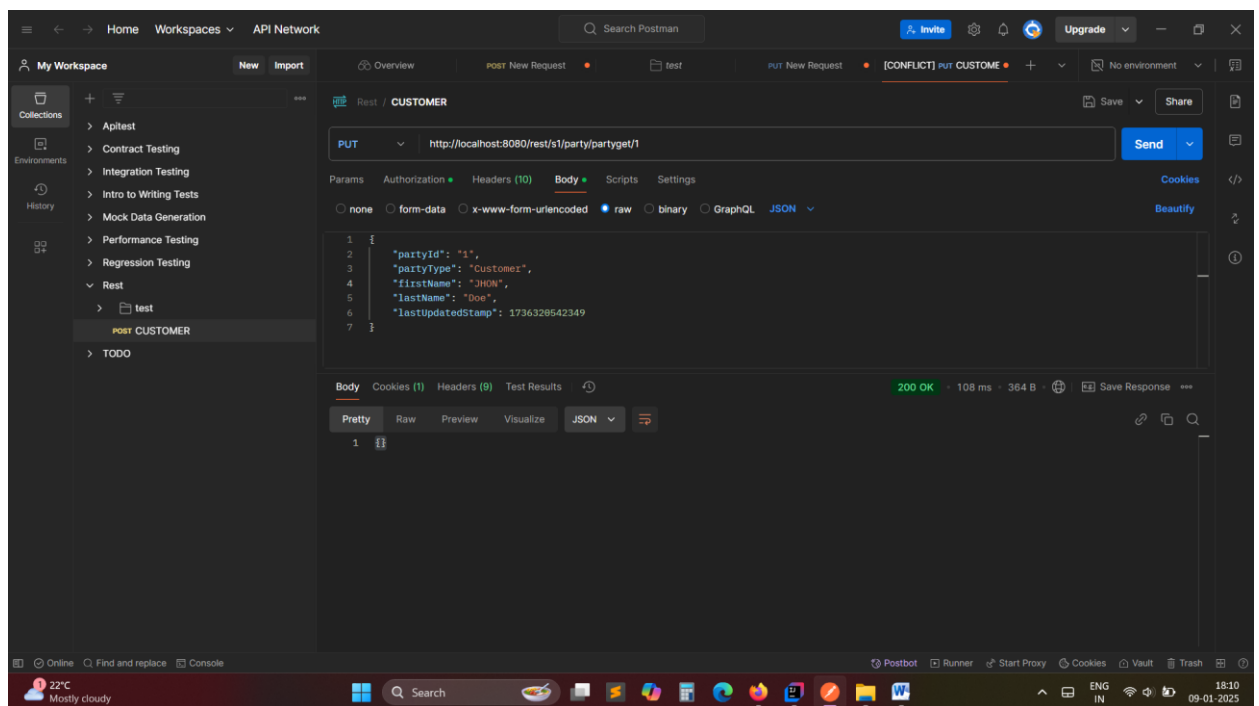

2. Retrieve Party Details: GET /parties/{party_id}

3. Delete a Party: DELETE /parties/{party_id}

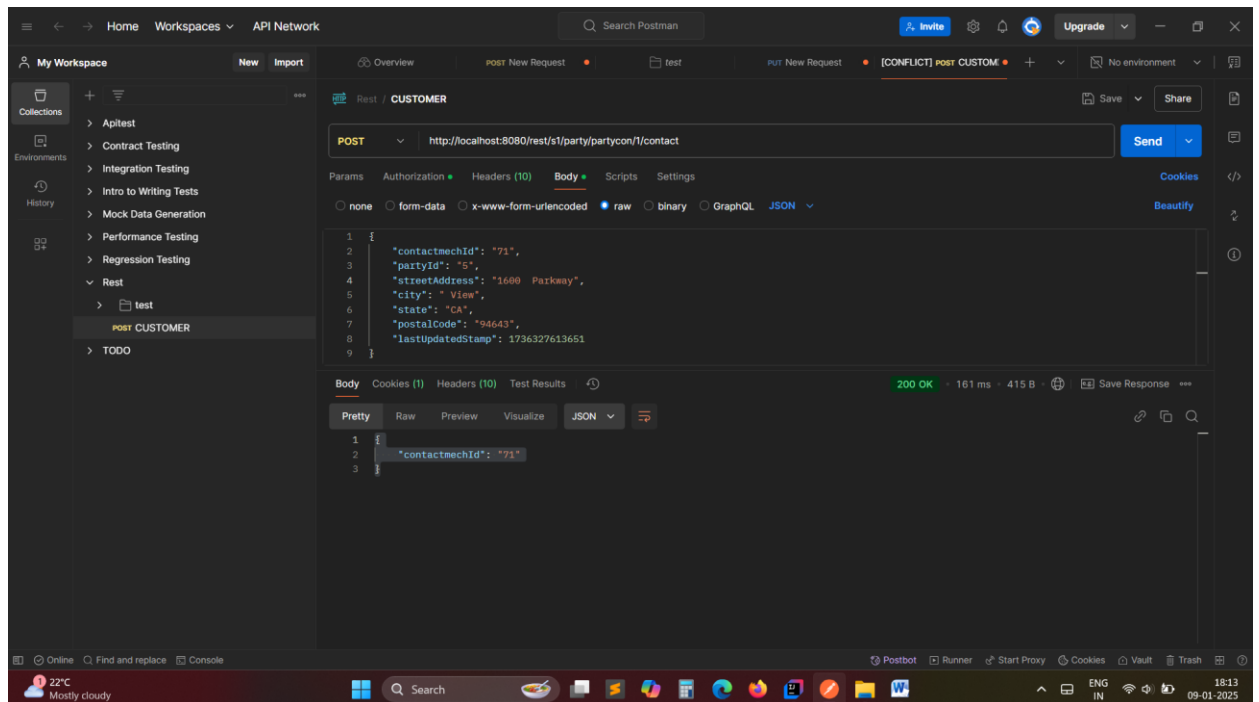

4. Update a Party: PUT /parties/{party_id}

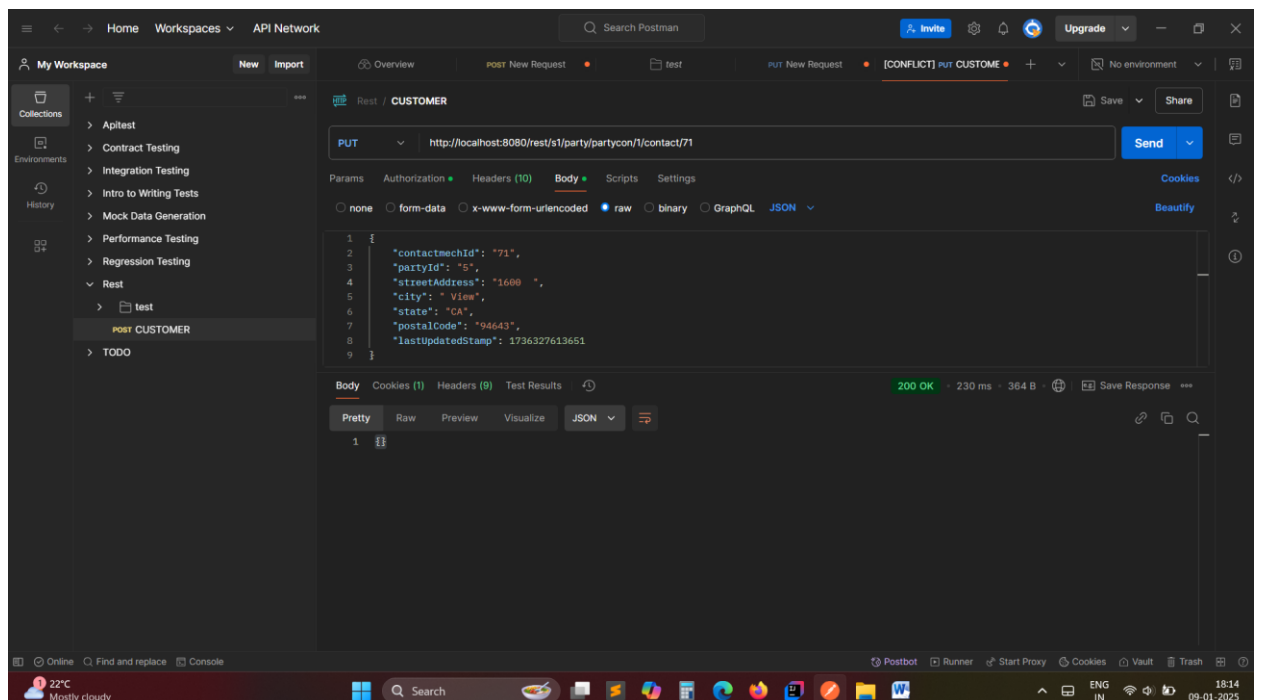

5. Manage Contact Mechanisms for a Party:

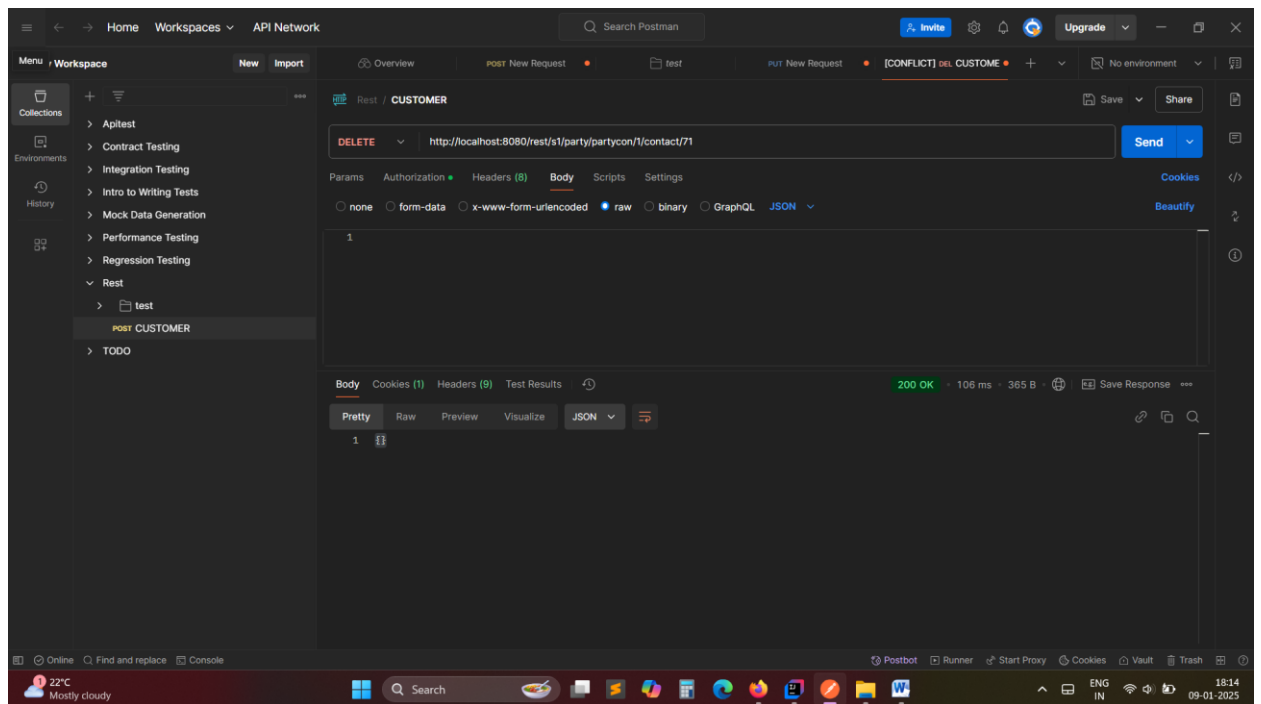

- **Add Contact Mechanism: POST /parties/{party_id}/contacts**

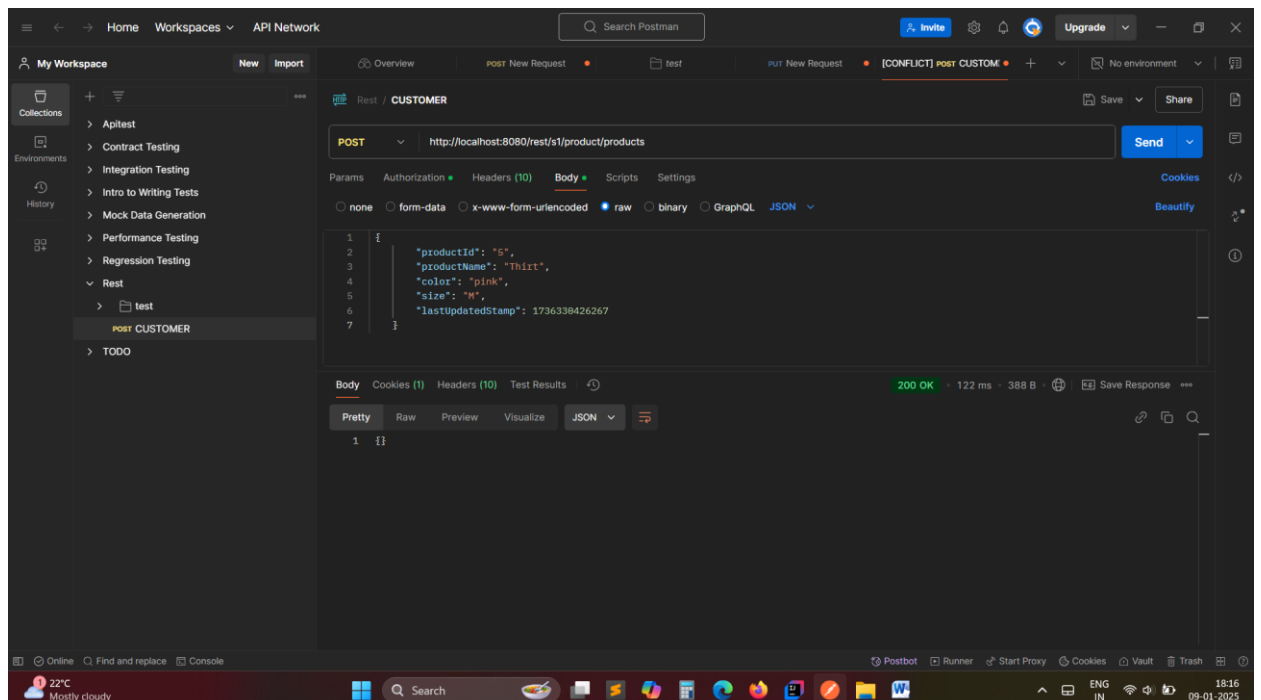

- **Retrieve Contact Mechanisms: GET /parties/{party_id}/contacts**

Delete Contact Mechanism: DELETE /parties/{party_id}/contacts/{contact_mech_id}

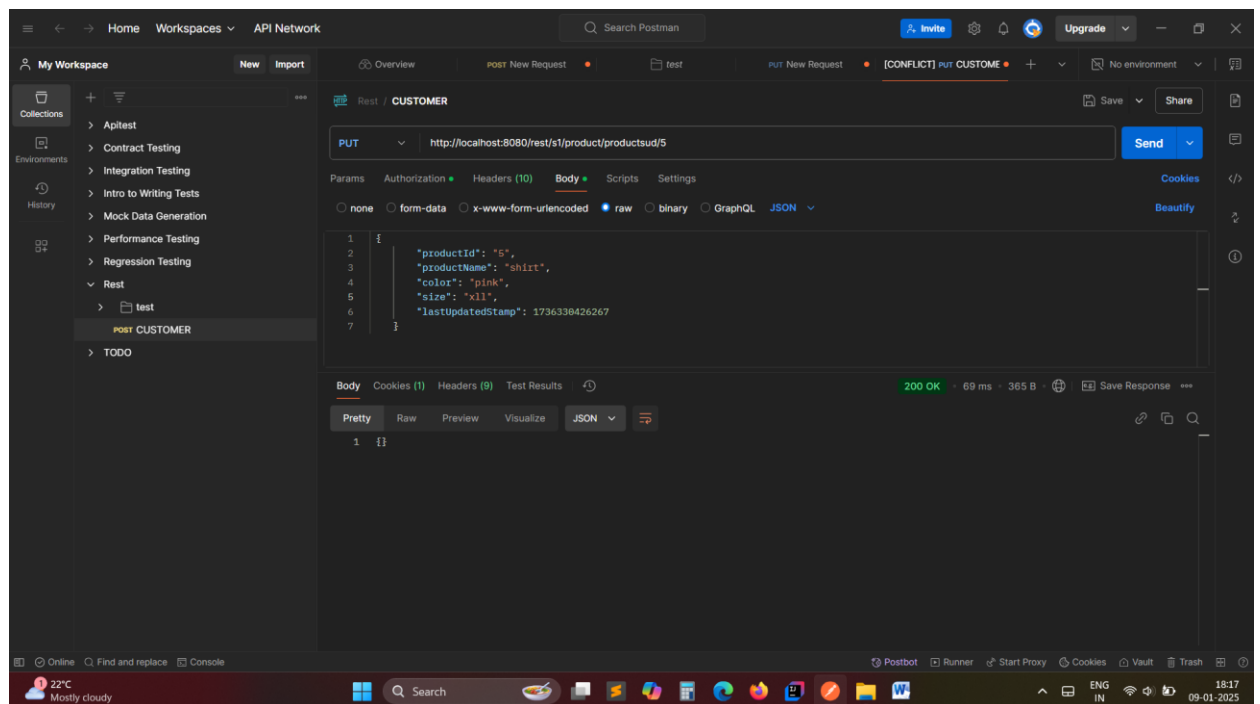

Update Contact Mechanism: PUT /parties/{party_id}/contacts/{contact_mech_id}

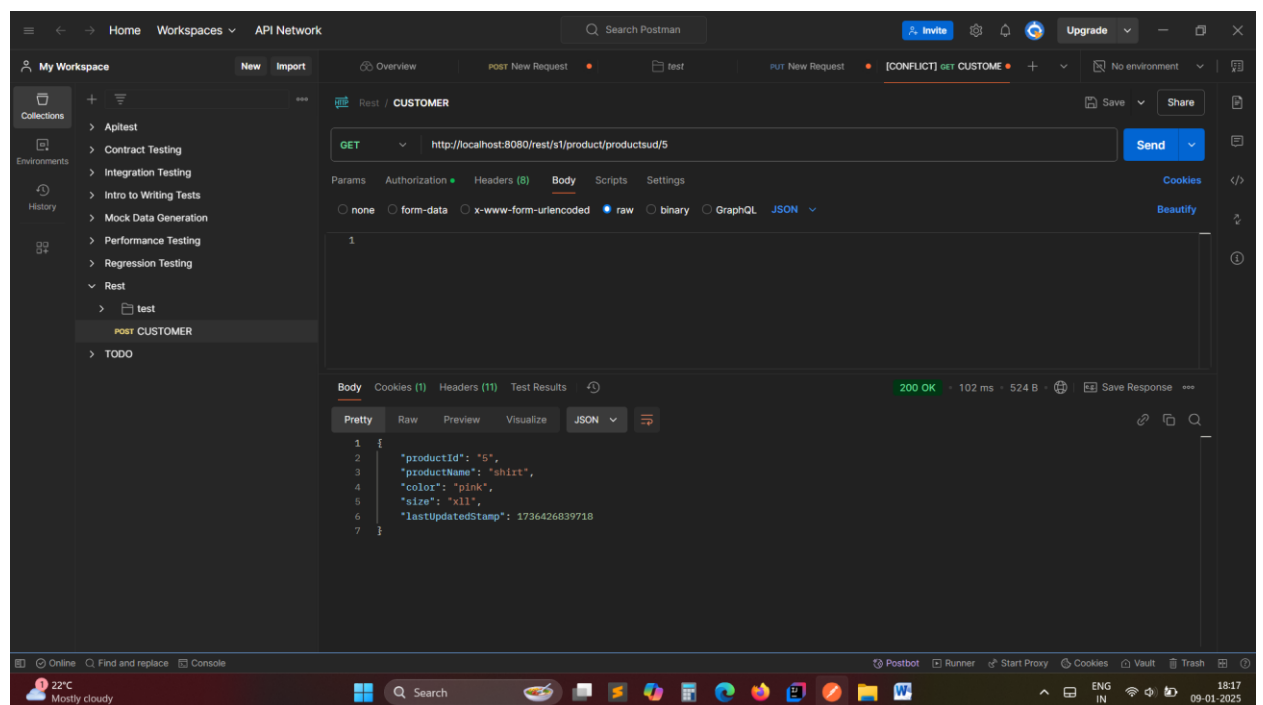

Develop RESTful APIs for managing product data:

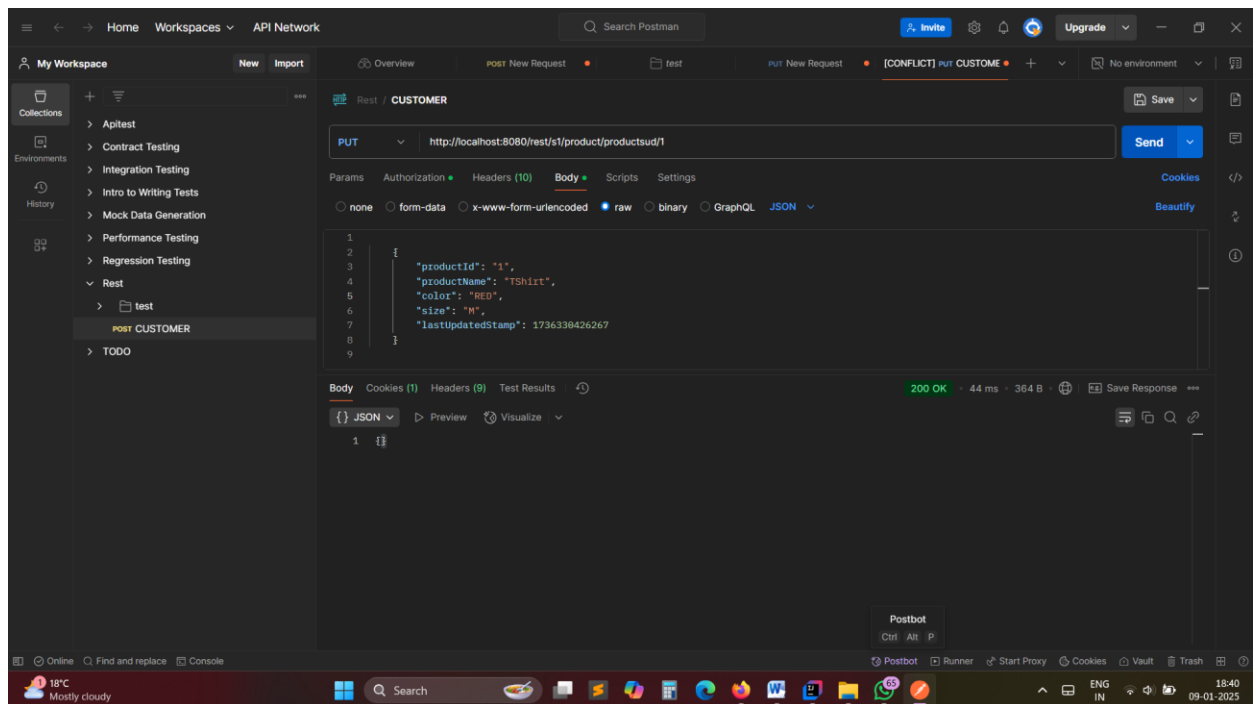

1. Create a Product: POST /products

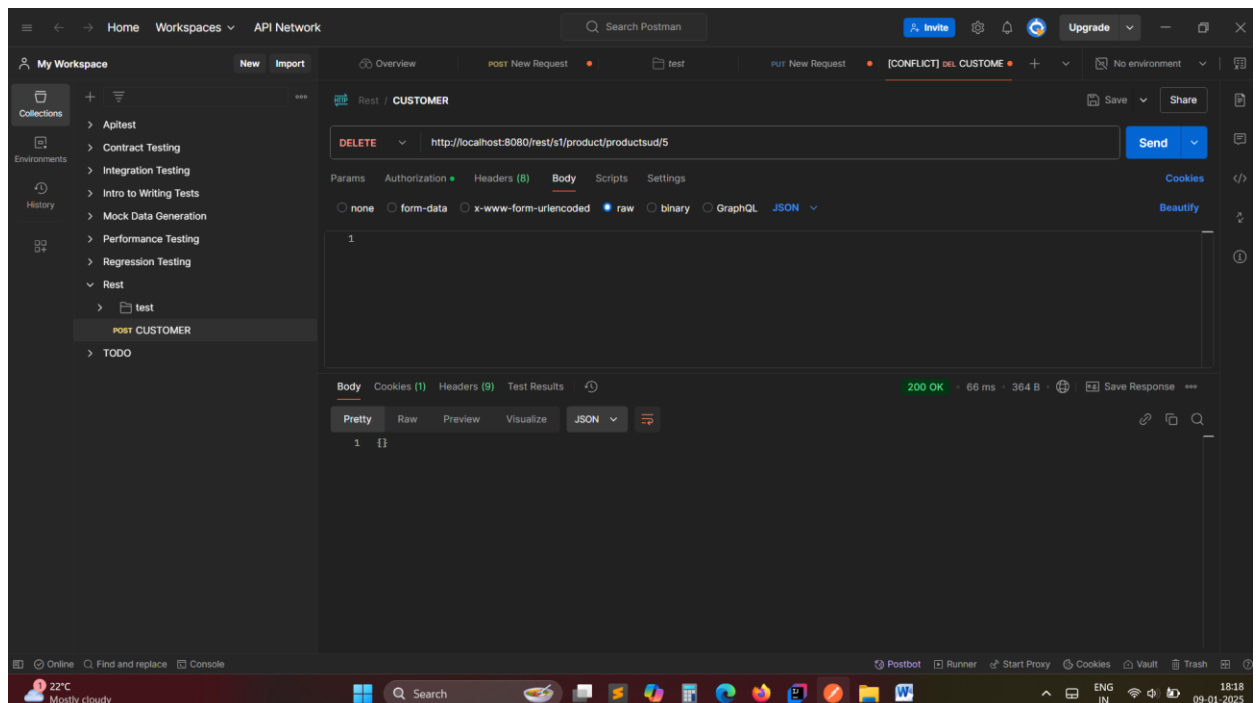

2. Retrieve Product Details: GET /products/{product_id}

3. Update a Product: PUT /products/{product_id}

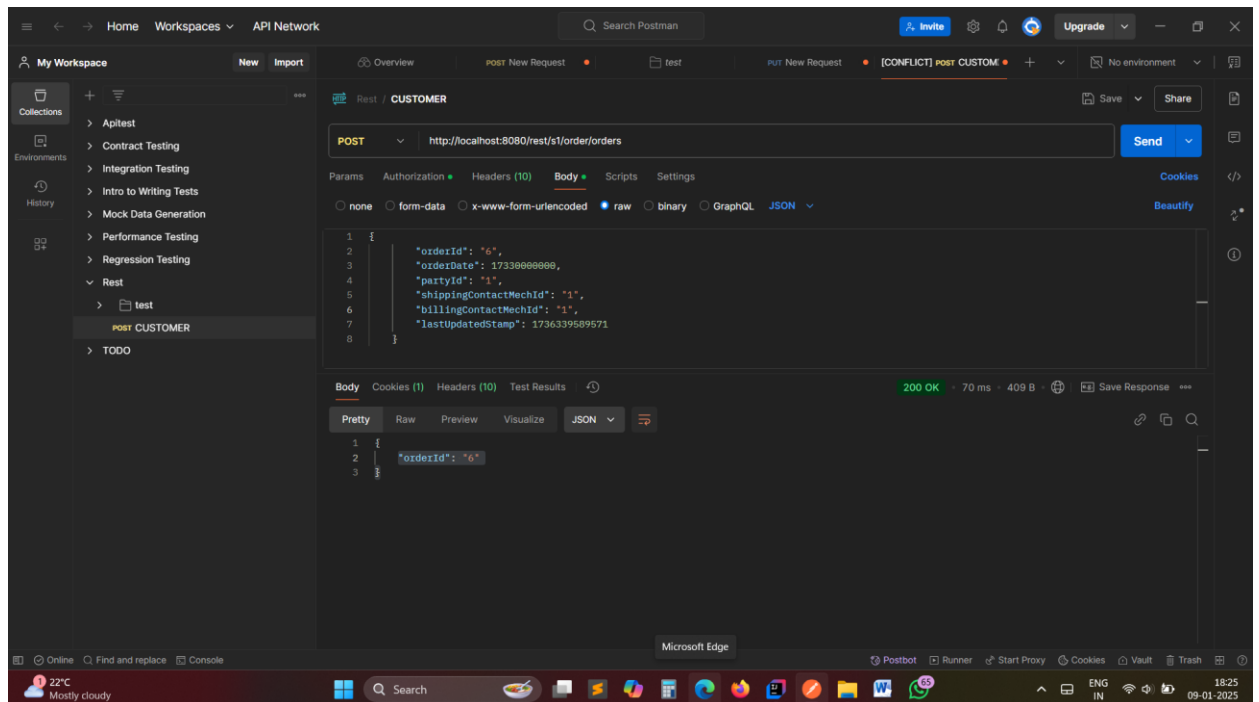

4. Delete a Product: DELETE /products/{product_id}

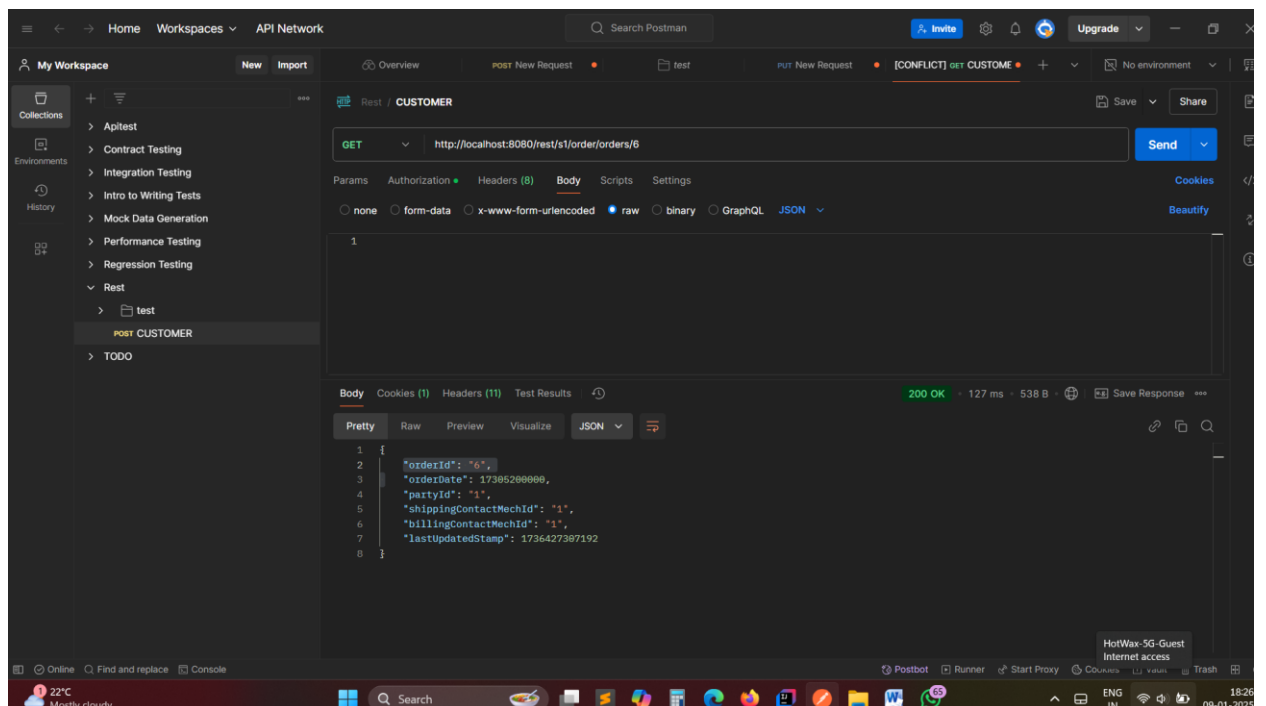

Develop RESTful APIs for managing orders:

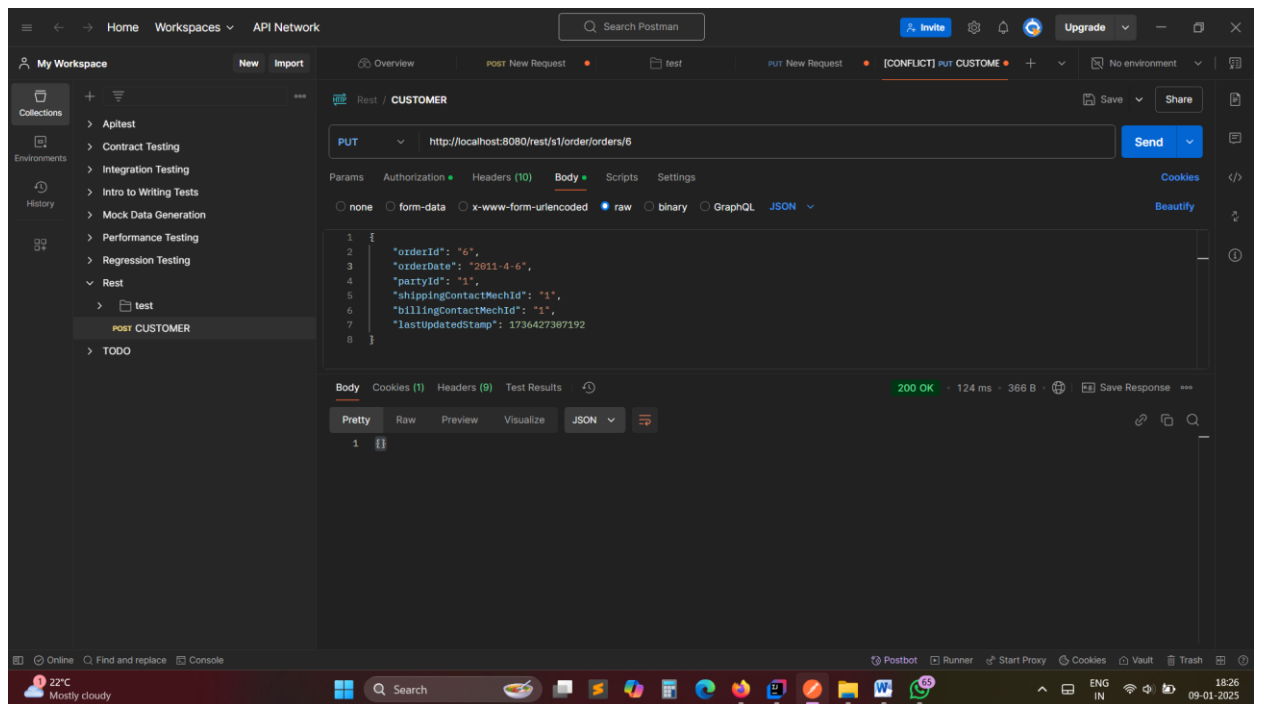

1. Create an Order: POST /orders

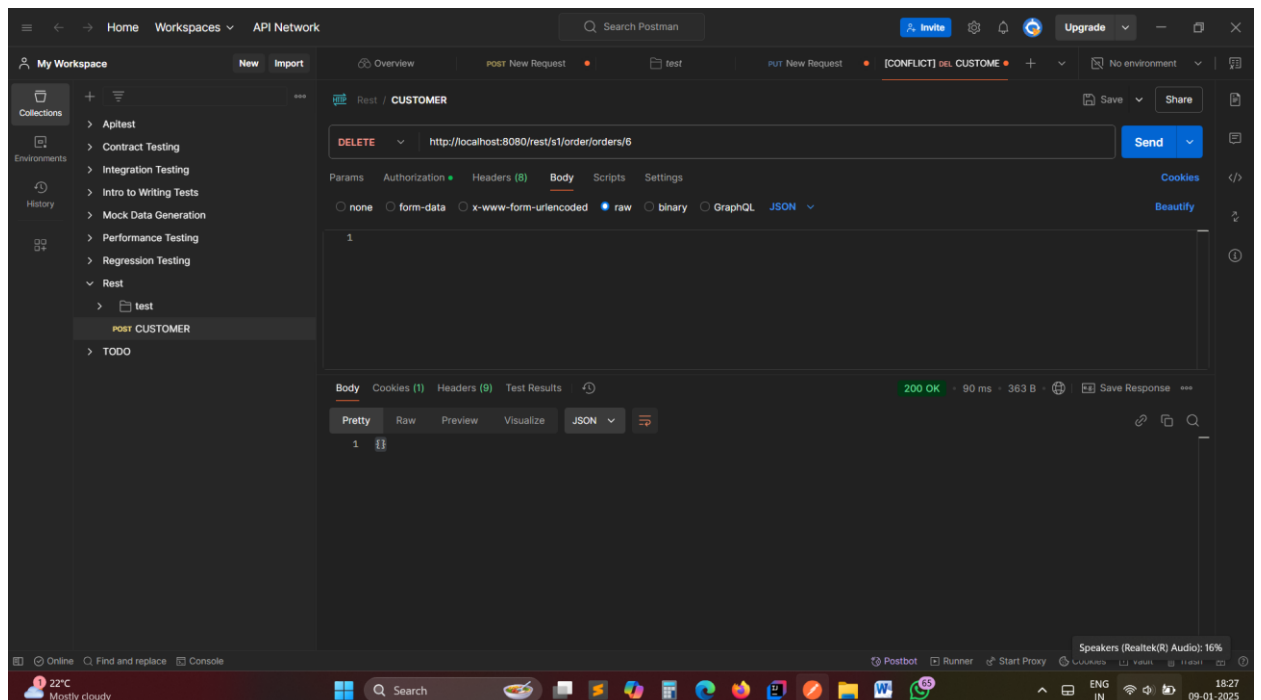

2. Retrieve Order Details: GET /orders/{order_id}

3. Update an Order: PUT /orders/{order_id}

4. Delete an Order: DELETE /orders/{order_id}

5. Add an Order Item: POST /orders/{order_id}/items
